EDUCATION

General De Jesus College

Bachelor of Science in Information Technology

Aug 2022 – May 2026

SAN ISIDRO NUEVA ECIJA

TECHNICAL CAPABILITIES

- Full-Stack Web Development
- Automation & Scripting
- Tech Support / IT Support
- Software Development
- Quality Assurance
- API Integration

INTERNSHIP

Virtual Pro Software Development and Services

July 2025 – Oct 2025

- Gained hands-on experience with MySQL for database management.
- Assisted in API development and integration tasks.
- Worked with Excel Pivot Tables to analyze and summarize complex data sets efficiently.
- Utilized Power BI to create clear data visualizations and dashboards for project monitoring.
- Explored cloud and data technologies including AWS, Snowflake, and Data Pipelines.
- Performed hardware diagnostics, PC troubleshooting, and component replacement to maintain internal workstations.

PROJECTS

Real-Time Web-Based Queue Management System with QR Code Tracking and SMS Notification (TypeScript, React, Django REST Framework, PostgreSQL, WebSockets, SMS Integration)

- Developed a full-stack queue management system supporting multiple services and service windows
- Implemented real-time queue updates using WebSockets for live monitoring across dashboards and displays
- Integrated QR code tracking for mobile-based ticket status checking
- Integrated SMS API services to automatically send queue notifications, ticket updates, and turn reminders to users.
- Designed staff dashboard with queue controls (call next, skip, recall, complete)
- Developed admin analytics (peak hours, service performance, queue activity)

LogOfUs: Multi-Tenant SaaS Relationship Diary for Couples

(TypeScript, React, Django REST Framework, PostgreSQL, JWT Authentication, Tailwind CSS)

- Built a full-stack SaaS platform enabling couples to document and share relationship memories, milestones, and experiences
- Implemented multi-tenant architecture with couple-based data isolation using JWT and invite-code partner linking
- Developed 10+ interactive features including shared timeline, bucket list tracker, memory calendar, watchlist ratings, and simple minigames
- Designed dark/light mode UI, animated backgrounds, and book-themed authentication pages
- Built RESTful API with data filtering per couple, automatic couple assignment, and token blacklisting for secure logout
- Integrated anniversary counter, photo uploads, and playlist recommendations with YouTube/Spotify link support

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React, TypeScript, TailwindCSS, ChakraUI

Backend: Python, Django-REST-Framework, Flask, FastAPI, C#, PHP

Tools/Database: PostgreSQL, SQLite, MySQL, Github, Git, Postman, Swagger, VSCode

Deployment & Cloud: Azure, Vercel, Render, Supabase

AI Tools: GitHub Copilot, DeepSeek, Claude, Gemini, ChatGPT, v0

Additional Skills: API Integration, PyQT5, PySide6, PC Troubleshooting & Hardware Diagnostics

SCHOOL ACHIVEMENT

- Deans Awardee
- Best in Capstone
- best in Internship

PROFESSIONAL SUMMARY

An adaptable Information Technology graduate specializing in Full-Stack Web Development and task automation. A fast learner with a proactive mindset, skilled in leveraging modern frameworks, cloud databases, and AI tools to build efficient software solutions. Eager to contribute technical skills and adapt quickly to dynamic engineering teams.
